Machine Safety Symposium: Modern Safety Solutions

You're invited to join us at the Machine Safety Symposium to collaborate with industry experts and peers while learning ways to improve safety and increase productivity in industrial environments.

Through practical examples and applications, you will gain insights on:

- The importance and practical methods of safety risk assessment
- Safety engineering design
- Modern, strategic approaches to machine safety
- Improving and streamlining lockout-tagout requirements and procedures
- The use of advanced safety methods
- Ethernet based machine safety control, diagnostics and analyses.

You'll have the opportunity to see:

- Software tools that are designed to create risk assessment documents
- System design and selection
- Program and configure networked safety
- Verification and validation steps

ELECTRIC SUPPLY & EQUIPMENT CO.

Tuesday, February 20, 2018

9:00 a.m. – 2:00 p.m.

Lunch will be provided
